

# THE GLEICHEN CALL

VOLUME XXX NO. 20

GLEICHEN, ALBERTA, WEDNESDAY August 4, 1937

SUBSCRIPTION \$2.00 PER YEAR

## LADIES S.C. GROUP COMBINE SPORT WITH BUSINESS

Thursday afternoon proved to be a splendid day for the regular semi-monthly meeting of the Meadowbrook Ladies Social Credit Group and picnic sponsored by same. About sixty members and friends were present, the president, Mr. R. B. Hayes occupied the chair. The roll call was answered by "My favorite sport."

The business of the meeting was carried through and then all adjourned to the garden which the hostess, Mrs. Nell McLean, had arranged for the sports. The sun shone brightly and the trees were beautiful, adding greatly to the pleasure of the guests.

A splendid program of sports under the sponsorship of Miss Ralphen and Verona Hayes, was carried through perfectly and was thoroughly enjoyed by adults and children prizes being awarded.

A delicious tea with lemonade and ice cream was served by the hostess and her assistants. The gathering, then dispersed, all agreeing the meeting had been a great success.

Mrs. Kenneth McPhee will be hostess to the next meeting of the Group on Thursday August 15th.

## SCOUT NEWS

Lord Baden-Powell, World Chief Scout, has been awarded the 1937 Waterloo prize of \$10,000, "for valuable services to international good will by means of the Boy Scout organization."

The Waterloo prize was founded by a Netherlands of that name, who left his entire fortune to endow an annual prize to be awarded the person contributing the most valuable service in the cause of peace.

A plan for more and to become scout leaders, in order that more boys might benefit from scout training was made by Warden Lewis E. Lawes of Sing Sing prison. "Scouting is valuable," he declared, "because it gives boys things to do in which they can take a real interest."

He told several stories of lawless boys who had quickly changed upon finding healthy activities that naturally interested them. "No boy should be given a chance to be a hooligan," he said, "until he has failed in something in which he has shown a real interest."

Never a day goes by but there is reported any number of automobile accidents, gravel highways and gas alone buggies being the cause of loss of life, permanent bodily or physical injury, and material loss.

The courts meet out fines, and, in different cases, imprisonment, while the automobile insurance companies raise their rates, and put those with a bad accident experience rating on the forbidden list, but still drivers of automobiles, with their speed, glare lights, and road hog spirit, not to mention non-observance of other car cursties, not only endanger their own lives, but what is more important those of innocent parties and others, who are making an honest effort to obey the rules of the road, and can be considered careful drivers.

Automobile drivers weave along the highways at a rate of speed that, if anything happens, it is just too bad. They may be expert drivers, but once worked into an impossible position, they are as helpless as a very ordinary driver. They are like a balloonist at Coney Island many years ago, when cautioned by his friends not to make an ascent on such a windy day, told them he knew his business. He knew his business, but the high wind drove him out to sea, and he went all the way to his doom. Good drivers know their business, but they often times go all the one way to their own self destruction and carry others with them. The man at the wheel has responsibility for his riding companions and also for those he meets, whether pedestrians, motorists, or drivers of horses. Then the road hog especially, if he is a speed artist, in real menace. He will drive over the ditch with little or no compunction. Had we the sentencing of a road hog in court, there would be no fine too large, or jail sentence too stiff, as the road hog knows what he is doing and deliberately does it. It is a case of pre-meditation in the bulk of these cases, as he feels the road belongs to him, being of the presumptuous kind.

## News Items of Local Interest

Mr. and Mrs. H. L. Phillips are at present spending their vacation at Vancouver and Seattle.

Miss Auld of Calgary has joined the staff of the local branch of the Bank of Commerce.

Fishing in the river is more popular this year than ever. Almost every fisherman brings home a nice feed of fish.

Chairman Farquharson of the school board announced the other day that school will open on Wednesday September 1st.

A splendid rain fell all day Sunday, but to late in the season to do much good. The parched fields of standing grain that had not been irrigated. No doubt, the rain will do a lot to benefit the feed situation.

W. Erford has probably one of the most gardens in the district, although the hail last week damaged it somewhat. If nothing happens this year, Erford's fruit trees will bear a heavy crop especially the plums.

R. M. Stabback of Calgary spent most of last week in town visiting relatives and friends. He spent a lot of his time fishing in the Bow river and finally on the last day of his visit he landed a fish which he took to Calgary to display to his friends.

Hail last Thursday afternoon did considerable damage to crops in the district north and east of Gleichen. Starting northwest of town the storm swept east for some 12 or 14 miles, then turning about west west, which was very similar to the hail storm that struck a couple of years ago. Some fields had a 100 per cent loss.

while others were badly damaged. Gardens in the path of the storm suffered likewise. Very little if any insurance was carried by these hail-out.

The slippery road Sunday caused the bus to slip into the ditch, near the town water tower. After spending an hour endeavoring to get out J. O. Bogstie hitched his team to the bus and had it out in a jiffy. The great joy of the driver and passengers.

On Thursday afternoon a very happy group gathered at the home of Miss Gladys Wilson, to honor Miss Isabel Wilson, whose marriage takes place very soon in Vancouver. Guessing contests were greatly enjoyed and prizes were awarded to the winners. Many pretty gifts were presented to the guest of honor in a gaily decorated box. A delicious tea was then served by the hostess assisted by Mrs. Annie Plante. At the conclusion Mrs. R. B. Hayes, president of the Meadowbrook Ladies Social Credit Group, presented Miss Wilson with a suitable gift from the Group and wished her all happiness and success in her new home.

M. Moynier, one of the successful farmers north of Cluny was a business visitor to Gleichen Tuesday. Mr. Moynier states he is well satisfied with his crop this year especially that which he irrigated.

During the past week the Indians have been busy hauling hay from the farms in the district. The drought has caused a serious shortage of feed on the reserve consequently the Indian department is busy buying vast quantities of hay from the farmers who have it to sell.

## FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

An excellent crop is expected to be harvested in the Queenstown area. Farmers state that on new breaking and summer fallow will average 25 bushels an acre, and some fields may go 30. Stubble is dried out in spots and oats will be a light crop. Harvest will start in two weeks. Some pieces of oats are already beginning to ripen.

Carl Herman who formerly homesteaded in the Lake McGregor district and since then has had a homestead in Montana, has bought land in the reserve. He thinks there is no place like that area.

Mr. and Mrs. J. O. Bogstie are enjoying a visit to Banff, where they left for last week.

According to reports all the material for the new bridge at Cluny will be on the spot by August 15. Work will then be started and the farmers south of the river will haul their wheat across it by the time the ice comes up around the ferry.

The town council is going to erect a brick chimney at the power house. This chimney will cost \$1150.

Jim Burk is building a house that will do everything else put up so far in the Queenstown district. There will be a hot and cold water system, electric lights and half a dozen other modern improvements.

One of the most successful and enthusiastic convocations of the Royal Agricultural Society was held in the Masonic hall Wednesday afternoon. Members were present from Macleod, Red Deer, Calgary, Strathmore, Bassano and Brooks. Degree work began at 4 p.m. and adjourned for lunch at 6:30, giving all chance to be in the baseball game between Bassano and Gleichen.

Mr. and Mrs. D. McKay and Mr. and Mrs. G. W. Evans and James Gibson motored to Banff last week to spend ten days sight seeing. Earl Mills of Queenstown has just finished his new house, and the young folks are expecting him to give a dance in it.

## THE WORLD OF WHEAT

By H. G. L. Strange, Director of "Crop Testing Plan."

Sir Charles Saunders is dead. His memory, and the fruits of his labor, however, will live for uncountable years.

Aided by the efforts of his brother, Percy, and his father Dr. William Saunders, Sir Charles, in 1907, originated the famous Marquis wheat. Marquis came at an opportune time when the western wheat area was expanding north, so that sterling variety, Red Fife, was becoming frosted in the late summer. Marquis, a week earlier than Red Fife, and of the same high quality, has, it is computed, added not far short of one hundred million dollars to the pockets of Canadian and American farmers.

Marquis is equally noted as a parent for breeding purposes. The famous variety Revard, the rust-resistant Thatcher, and other valuable sorts, being direct offsprings from it.

Sir Charles was one of those true agricultural scientists, of which Canada is fortunate in having many in her service, who indenture their lives to the improvement of agriculture, to the increasing of the farmer's welfare, and to making available to the people of the world a plenitude of food. Millions of people, the world over who have never heard his name are better off because Charles Saunders lived and labored.

Following factors have tended to raise price: Argentine conditions dry, seeding delayed. Expect Italy will make substantial wheat imports. Conditions generally favorable for growth of U.S. corn crop. Japanese rice stocks above last year. Mexican wheat coast vegetable exports increase.

Following factors have tended to lower price. Expect sizable U.S. wheat export surplus. Harvest commenced in U.S. northwest. Brazil legislature to increase wheat production. Conditions generally favorable for growth of U.S. corn crop. Japanese rice stocks above last year. Mexican wheat coast vegetable exports increase.

## For More Than 30 Years

For more than thirty years this farmers' company has been giving satisfaction to western farmers in handling their grain. During that time it has also been of great assistance in improving conditions under which farmers do business.

Deliver your grain to

## UNITED GRAIN GROWERS

Elevators at: Gleichen, Arrowwood, Shouldice, Cluny, Namaka.

## YOUR LITTLE SAVINGS... FINANCE MORTGAGE LOANS

TENS of thousands of Canadian farms and homes benefit from first mortgage loans made possible by the accumulated savings of Life Insurance policyholders.

For every borrower, there are six thrifty people who supply the necessary funds.

This fact affords a striking illustration of the "double duty" performed by Life Insurance dollars. Not only do they ensure financial security for the men, women and children of Canada, but they also help to build and finance their farms and homes.

Life Insurance companies exercise the greatest care in the selection of properties upon which mortgage loans are made. To safeguard the savings of policyholders, security of principal and interest is and must always be the first consideration.

## LIFE INSURANCE GUARDIAN OF CANADIAN HOMES

The latest example of class consciousness which has come my way. A lady from a big house calls on a lady in a little house. "We are very much troubled with rats at home, I suppose you are similarly bothered with mice."

The latest example of class consciousness which has come my way. A lady from a big house calls on a lady in a little house. "We are very much troubled with rats at home, I suppose you are similarly bothered with mice."

## JUNIOR LIVESTOCK FAIR

Below appears information regarding the Junior Livestock Fair to be held this fall under the auspices of the Gleichen District Agricultural Association and doggers will also be distributed around the district.

The fair this year is being restricted to certain classes but if the efforts of the Association meet with success this year it is the intention to enlarge the different classes next year.

The fair can only be a success if the parents of the children will put forth every effort to have the boys or girls in the district put in entries.

The committee expect to have competent judges for the fair and it also seeks the active co-operation of all farmers and business people in the district in order to make the fair a success.

The following are the classes of exhibits and regulations governing the Junior Live Stock Fair to be held here near the end of September.

### CLASSES

- (A) Draft colts, any breed, 1937 colts.
- (B) Calves 1937
- (1) Dairy type.
- (2) Beef type.
- (C) Pigs, one class.
- (D) Sheep, best breeding ewe type, pure bred or grade of the current year.

### Rules Governing the Competition:

- 1. Age limit 12 to 22 years old.
- 2. All entries have been the care of the entrant from 9th of August 1937.
- 3. Livestock must be handled at the fair during the judging by the entrant.
- 4. Consideration will be given for handling and docility in the horse, sheep and dairy classes. A strong effort should be made to have all animals in good show appearance.
- 5. All entries must be in the pens not later than one p.m. the day of the fair.
- 6. Entries should be in the hands of the committee not later than 7 days before the date of the fair.
- The date of the fair will be either 29th of September or 2nd October, 1937. The definite date will be published later as well as the exact place where the fair will be held.

Good cash prizes will be given, but the amounts allocated will depend on the number of entries in each class.

For further information get in touch with R. P. Umbrite, J. A. McArthur, Alex Buckley, John Boyd, C. W. Halstead and James Black.

## Essential Government

Since the onslaught of the now famous and much publicized depression one has heard occasionally the suggestion that municipal government should be abandoned, the proposal usually being advanced in the interests of economy. As the depression deepened and its baneful effects became more apparent this proposal was heard more frequently in the prairie provinces—the hardest hit section of the Dominion.

The suggestion has emanated from various sources and has cropped up now and again here and there, but fortunately the idea does not appear to have gained much ground, nor has much weight been given to the suggestion in any influential quarters. It has not received support by those who are able to seriously influence public consciousness.

It is true that the cost of government in this country is too high. There is no gainsaying the statement that public expenditures for services rendered are excessive and should be curtailed but, even considering the matter solely from an economic viewpoint, it is doubtful whether any saving to the pockets of the people would be effected by the abolition of municipal administration, either urban or rural. On the contrary, there are very good reasons for believing that such a move would result in an increase in the cost of government.

If there is any form of government which should not be impeded, and still less abandoned, it is local self-government.

There are services rendered by the municipality, urban or rural, which could not be rendered either as effectively or as economically by a more remote authority. It is not necessary to enumerate those services. Any person can at once think of a number of them. They are services which the people would not be content to do without and would not wish to have performed as privately-operated enterprises. In fact, they are now being rendered on a community basis because, for more reasons than one, people have come to the conclusion that such services can be provided more efficiently and more cheaply as municipal enterprises.

Moreover the nature of these services is such that the conditions under which they are provided have to be suitable to local conditions and local requirements. Under long range administration they would inevitably be expected to conform to a pattern which would render them valueless in some localities and of little use in others. Further, when changes in form of service were required because of seasonal or local conditions, the necessary changes could not be made effective in time to be of any value if appeals had to be made, either to provincial or Dominion capitals.

To offset this handicap of inaccessibility it would be necessary for the central authority to establish and locate officials in every small unit throughout the country and they would have to be clothed with sufficient authority to make rules and regulations to meet changing local conditions, involving the establishment of a regular army of inspectors and administrators who would have no direct responsibility to the people they served and would not be responsive to local demands. Such a system would not only tend to inefficiency but would inevitably be expensive.

But apart from the questions of economy and efficiency involved in such a proposal there is an even more potent reason, not only for the retention but the strengthening of local self-government.

Local self-government has often been referred to as the keystone in the arch of democratic government and its removal would weaken the entire structure of democratic government. In this direction it would have a far more serious effect than at first blush might be supposed.

Municipal government is the government closest to the people it serves, and because of this it is most responsive to the wishes of the people. It is the kindergarten of all democratic governments and more often than not is the training school for service in the provincial and Dominion arenas. In the local councils the majority learn by experience that they must carry out the wishes of the members if they are to continue in office and yet at the same time afford some protection for the interests of minority groups—the foundation of all democratic rule.

It has not and cannot be demonstrated that abandonment of municipal government would effect one iota of saving to the taxpayers, nor can it be shown that the services rendered by the municipal government could be more efficiently rendered by other and less responsive authorities.

The loss of local self government would be a serious thing for the people and might well be the beginning of the loss of all self-government.

## Are Flourishing Again

Henry V. Founded Boy Players Of London In 1419

Not long before he died, King George V. was instrumental in reviving the famous Boy Players of the City of London, and during this coronation season these sweet-voiced children, clad in ankle-length robes, Elizabethan surcoats, black velvet knee-breeches and white-plumed hats, have taken part in several functions. Originally founded in 1419 by Henry V., the Boy Players were the only actors admitted to the city of London, and were now the financial district. They laid the foundations of English drama, reaching their highest skill in Elizabethan times, when many of them created the great Shakespearean heroes for the first time on any stage. Their work ended in 1609, but now they have begun to flourish again. Not only do the boys sing madrigals, but they appear on the stage at the Old Vic and in opera at Sadler's Wells and are also in demand for pageants.

—Charlottetown Guardian.

## Physical Training For Youths

Lord Baden-Powell Opposes It For London In 1419

Lord Baden-Powell, the Chief Scout, attacked gymnastic training for youths.

"There is no reason for gymnastics as far as I can see," he declared at a dinner of the 100 Club at Grosvenor House.

"The finest men I have ever met had no gymnasia but they had plain food of a healthy kind and took plenty of outdoor exercise."

Who are now trying to inflict physical training on poor boys, not very well off.

"It is not, I think, quite the right way of developing a strong healthy nation," he added, "because no two boys are alike in physical ability and a great many are not fit for the work given to a whole squad."—Overseas Daily Mail.

## A Gentle Hint

Two Scotsmen were watching a football game. One had a bottle, the other only a thirst. The bottle man was talking very loudly about his knowledge of the game and what a fine player he was himself. During the conversation he helped himself liberally to the contents of his bottle, whereupon the thirsty one said: "Well, I notice you're a fine dribbler, but you're no good at passing."

Desert animals and birds, as well as all garden guests, their thirst by tapping barrel cactus, natural water barrels.

## Newfoundland Airport

Modern Methods Waging A Successful Battle With Nature

A group of almost 1,000 men-browed men and \$500,000 in machinery are waging a successful battle with nature, as they have a great airport out of virgin timberland in Newfoundland's bid for trans-Atlantic air-route recognition.

Under direction of resident engineer T. B. Woodruff, of Toronto, one of the builders of St. Hubert's airport outside, Montreal, shifts of men and machines work 24 hours a day; cutting, clearing, ripping, leveling and grading over an 800-acre gash in the dense timber country, 213 miles northwest of St. John's by rail, and about 130 miles from the capital by plane.

A mile to the east, three towers are rising from another man-made break in the forest where a wireless station with the most powerful and modern equipment available will guide huge planes on their trans-Atlantic dash.

More than 20 tractors, a giant stone crusher, Diesel-powered shovels, ground-ripper, rosters, railway engines, steamrollers, conveyors, graders and trucks are working continuously.

Four runways, surfaced with an asphalt-like substance, are planned. No. 3 runway will be 4,500 feet long and 1,200 feet wide while the other three will each be 4,500 feet in length with a breadth of 600 feet.

Work has suddenly been speeded up on No. 1 runway with a strip 250 feet wide and running the entire length now completely graded and ready to receive its first plane, although the hard surfacing is yet to come.

The concentration of work on the one runway is taken here as evidence supporting persistent rumors a giant air-equipped plane is undergoing preparation in England in preparation for a trip to the new airport this summer. It is predicted the new plane, with a cruising speed of 200 miles an hour, will make the dash in 10 hours.

## No Liquor Advertising

Broadcasting Corporation Is Not Contemplating Acceptance Of Programs

Major W. E. Gladstone Murray, general manager of the Canadian Broadcasting Corporation, has issued the following statement:

In view of current misunderstanding and misrepresentation, the Canadian Broadcasting Corporation announces that the acceptance of programs sponsored for the sale of spirits, wine or beer is not contemplated for any of the stations of the corporation or any of its networks.

However, the Canadian Broadcasting Corporation is responsible for the control of all broadcasting in Canada consideration is being given to revised regulations.

In this connection special attention is being paid to the problem of the sponsorship of wine and beer programs in the province of Quebec by private stations where such programs are allowed by the laws of Quebec and the regulations of the radio commission and have been broadcast by some private Quebec stations for a number of years.

## Actor Had Hard Struggle

Sir Cedric Hardwicke, Worked Hard To Attain Success

Sir Cedric Hardwicke, who has returned to London after a long stay in Hollywood had a hard struggle in his younger days on the stage.

For a long time his parents refused to let him be trained, and even when he got a walking-on part at the Lyceum at the age of seventeen, he was told he was no good.

He was so discouraged by this and other experiences that when he returned to civilian life after the war he decided to take up another career. A chance meeting with Sir Barry Jackson, however, made him change his mind.

Sir Cedric claims to have been the first British officer to leave France after the war. It was his duty to haul down the flag at St. Pol in 1921, and he still keeps the flag in his property basket.

He was also one of the officers to mount guard over the body of the Unknown Warrior before it was brought to England.—News of the World.

A high school girl, seated next to a famous astronomer at a dinner party, struck up a conversation with him by asking, "What do you do in life?" He explained, "I study astronomy." "Dear me," said the girl, "I finished astronomy last year."

In an accident the only thing better than presence of mind is absence of body.

Shipyards of Finland are operating 24 hours a day.

## THE NEW PALESTINE

The result of the findings of the Royal Palestine Commission, headed by Lord Peel, calls for the dividing of Palestine into three parts. The heavily shaded area on the seacoast represents the area allotted for the realization of a Jewish national home, while the proposed British-administered neutral zone, including Jerusalem, is indicated by the lesser shaded part. The remainder, or two-thirds of the country, is reserved for the suggested Moslem sovereign state.

## SELECTED RECIPES

### FRUIT SALAD DRESSING

- 1 egg
  - 1 tablespoon sugar
  - 2 tablespoons Crown Brand Corn Syrup
  - ½ tablespoon Benson's Corn Starch
  - ¼ teaspoon mustard
  - ¼ teaspoon salt
  - ½ cup pineapple juice
  - ½ cup orange juice
  - ½ cup elder vinegar
  - ½ cup apricot jam
- Method: Break the egg into top of double boiler; add sugar, Crown Brand Corn Syrup, Benson's Corn Starch, mustard and salt. Beat all vigorously until three are lump in the mixture. Now add the fruit juices and cook in top of the double boiler until the mixture begins to thicken. Stir in the vinegar and again cook for 10 minutes. Strain, and when cold fold in the stiffly whipped cream. This makes a delicious salad dressing for all fruit salads.

## Interested In Children

Queen Mary Attends Garden Party To Aid Of Invalids

Since the accession of the King and Queen it has been noticed that Queen Mary has often taken over the little Princesses at public functions. On June 12 Her Majesty went to a children's garden party held in the beautiful grounds of Lambeth Palace, where young people were enjoying the fun of the fair with swings, roundabouts and donkey rides. Queen Mary, seated on the broad terrace to receive parades from schoolchildren from all over the country and the children of members of the committee who were organizing the garden party. Queen Mary takes great personal interest in the Invalid Children's Aid Association, for whom the garden party is given. In the past she has sent pinprizes from Sandringham for the little patients, and after banquets at Buckingham Palace, the sweets on the tables have been sent to them at her instruction.

## The Thing That Counts

Not Fortune A Man Has But The Money He Is Used

A dispatch from Calcutta claims that the Nizam Hyderabad is richer than John D. Rockefeller ever was. The Nizam is reputed to have a stack of gold ingots and a collection of gems worth \$500,000,000. John D. Rockefeller's fortune was estimated at one time at a billion dollars, but Mr. Rockefeller never had \$900,000,000 in bullion and gems.

The fortune is amassed, remained in circulation and kept the wheels of industries upon which tens of thousands of other people depended for a living, turning.

The important thing is not the amount of money a man has, but the way to which he puts it.—Detroit Free Press.

A new type of brick retort makes smokeless fuel, gasoline, and heavy oils from any suitable kind of coal.

## No Onions From Spain

One Reason British Market Has Opened To Canada

An insignificantly placed item in the news the other day tells of onions exported from Canada to England for the first time during the last fiscal year ending in March. This is no doubt a cause for congratulating the Department of Trade and Commerce, even though the exporters might have wished the total to have been larger.

Why has the market so suddenly been opened to Canada? In the absence of further details it may not be far wrong to guess that Canadian onion-growers can thank the war. The British housewife for years has been accustomed to ask for "Spanish onions" at the greengrocer's. And in addition a familiar autumn sight in and around London, are swarthy foreign-looking men, shouldering curious strings of onions, knocking at suburban doors, and in broken English offering their wares for sale. Those foreigners are the sturdy Basques who venture abroad regularly after the onion harvest to trade a bit and see a little bit more of the world than their own hardy country.

There will hardly be any picturesque onion-selling Basques in England this autumn. The only Basques making the journey over to England this year are the hundreds of little refugee children who have lost home and parents and all their little world in the horror of a modern civil war.

But Canada for the first time on record sells onions to the United Kingdom.

## A Real Grievance

Messenger Boys Had Good Reason For Apparent Courtesy

A pretty young lady we know found herself upward bound in an office-building elevator the other day, in the company of a Postal Telegraph messenger boy. Not only did the boy keep his hat off during the trip, but he held it over his heart. This touched the young lady deeply, but she was more astonished than touched to meet another Postal Telegraph boy on her trip down, also with his cap clasped to his heart. She finally whipped up enough courage to ask him if this was some sort of company rule. "Listen, sister," he said, passionately, and with no marked degree of courtesy, "what would you do if you had to wear one of these?" Removing the cap from his breast, he pointed to a badge, almost the size of a saucer, that in tremendous letters, "ASK ME about the new twenty-five word message."

## Oat Production

Oats rank second only to wheat on the basis of world production and, although the crop may be grown under widely different soil and climatic conditions, about 75 per cent. of the world crop of oats is produced in six countries, namely, Canada, the United Kingdom, the United States, Germany, France, and Russia.

The term "call money" is applied to money which is loaned on condition that the loan be repaid at any time the person making the loan calls for the money.

## Have Better Safety Record

Deaf Drivers More Careful Than Those With Normal Hearing

There is a belief commonly held that persons licensed to drive automobiles should be physically sound in every way. Experience, however, shows that a physical handicap, if it is not too serious, is actually a safety factor.

The Ontario Association for the Deaf in a recent statement pointed out that deaf, and hard-of-hearing drivers, have a better record of safety than those with normal hearing. During the past eight years only five deaf drivers were involved in accidents, none of which ended fatally, or resulted in serious injury. In three of the cases the good-hearing drivers were deemed to be at fault, and the other two cases were due to speeding. The reason for this, of course, is that the deaf driver is unable to rely on his ears to help him at the wheel. Normal drivers in this respect listen for oncoming traffic and other sounds, whereas the driver with impaired hearing is ever on the alert with his eyes. As it is upon his sight that he depends more than any other sense. He looks for cars, pedestrians and signals with more intentness.—St. Thomas Times-Journal.

## Versatile Business Man

Merchant In Ontario Town Has Been Blind For Years

Blindness is no handicap to Orville Frayne, called the most versatile business man in Forest, Ontario. Orville, who is "always 21," lost his eyesight through illness when he was 21.

He operates a tobacco and soft drink shop, where he sells rubber mats, bead work and leather belts he himself makes. He also sells and buys livestock, trades in wool, shears sheep, and keeps for rent jacks to raise buildings. Besides, he is an expert euchre player. He can read both Braille and New York point, and it is with these systems of raised characters that he plays cards. Other players announce the cards they lead when playing with him.

"I can remember what everybody's held, sometimes days afterward," Frayne says.

His patrons are farmers and he frequently visits them and helps with the farm work. Being blind teaches a person to concentrate, and this often gives him an edge over persons in full possession of their sight, he claims.

## New Bone-Setting Formula

Adjustable Brace Allows Animals To Walk On Broken Leg

A new bone-setting formula, expected to save the lives of thousands of animals heretofore destroyed because they wouldn't keep off broken legs, was described to the Eastern States Veterinary Association by Dr. Otto Stader, of Ardmore, Pa. Small aluminum pins are put into each side of a broken bone from an adjustable brace. This permits a dog to walk while the break is healing.

It is dissatisfaction that is our salvation. We weren't meant to be contented. Neither happiness nor accomplishments lie that way.

## And Far Handier Than Older Ways!!!

Here is the most useful waxed tissue package you've ever seen.

This new pack contains 45 sheets of silver white waxed Tissue. Through the top of the pack is a metal eyelet for hanging on the wall. Inside, the tissue is held in an ingenious grip so that you can withdraw one sheet at a time by simply reaching out with one hand.

"Presto-Pack" thus becomes the handiest of all kitchen aids. You will wonder how you ever managed without it.

## THE YELLOW BRIAR

A Story of the Irish on the  
Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas  
Allen, Publisher, Toronto.

CHAPTER VIII.—Continued

Bob finally tired of watching the antics of the excited heifer and the silly goings on of the man. He jumped up on Marshall and whined at him, invited him to exercise a little common sense. Then he led the man in quite another direction and far off from the cow, and across the creek and over a little knoll, the excited heifer, chasing after them, saw the two brutes find their hidden calf.

Now, you apprehend, gentlemen, I am merely summing up the facts for your guidance; and from these facts you will draw your own conclusions. I am not suggesting that Bob thought the silly, little, soft-skinned calf would make it a simpler job for him to drive the mother up there twice daily. I do not say that Bob wanted the calf taken up at all. I should, however, point out to you that the contradictory evidence discloses that the dog showed unmistakable signs of delight as Marshall hoisted the eighty weight of young life across his shoulders, and gripping its soft legs, dragged homeward followed by the excited and wild-eyed mother. As I said before, I am merely summing up the facts for you.

It is, of course, merely a play of fancy to attribute to the dog the thoughts of the human mind. What the woman he loves really thinks of him is past any man's finding out; and next to that, comes the mystery of what is going on in the mind of his dog. The human cannot even know what sort of a world it is a dog thinks he is living in. The creature's concepts of time and space may be different from ours. Objects may have other color tones for him; and sounds that please some human ears are often painfully distressing to a dog. Neither the master nor his dog can ever know the physical world save as thoughts floating on a stream of consciousness, and these are rather than as anything, neither of them can know anything about it; and since they cannot talk the matter over and compare notes, the dog and his man can never be quite sure their separate dream worlds are similar in kind to one another.

But a man does know and can understand the feelings and emotions of his dog. He knows, for instance, that the dog has a conscience, and is sorry for his sins. He knows that for the dog anything is a sin that displeases his master; and that in the dog's life such sins are usually committed because he does not understand. As with the dog, so with the human, sin is caused by lack of love or by ignorance.

Well, up on that Mose farm, time kept flying by; and by the spring of 1884, we had buried Old Hickory Mick, the Catholic school teacher. The Orange families had grown into a fainter in mind, now that they had for master a good Protestant like Nathaniel Carson, who did not believe in a god at all. Meanwhile, Bob O'Neil Pilslog had grown into an orderly and quiet dog. Once in awhile, he might go off for a day or two, to come back with the fatigue of love in his brown eyes; but the days of joyous play and romping

## BLACKHEADS

Get two cures of porrine powder from your druggist. Sprinkle on a hot, wet cloth and rub the face gently. Every blackhead will disappear. Use the one safe and simple way to remove blackheads. Have a Hollywood complexion.

were no more for Bob; nor for his boy, Charlie, who was now a sturdy, serious-minded lad of fourteen. They remained as great friends as ever, but neither saw any occasion for displaying feelings that were depressing with the passing years. Charlie had developed into a regular, thorough-going, young farmer, much to his father's pride and joy; and Bob still brought the milk cows home at five.

Yes, time kept slipping away like dry sand through one's fingers. Rev. C. M. Clarke came to the Mose Wesleyan circuit to carry on what he called his peripatetic ministry. He was a well-educated young Englishman from the town of Bristol, full of enthusiasm and painstaking; he was a fault; but he was a greenhorn on his first preaching appointment in Canada; and he was no horseman. He arrived at Mose Mills on foot; and the local Quarterly Board directed one of its brethren, Thomas Henderson, to secure the new minister a horse to bear him over the long stretches between his preaching appointments. The minister thanked the board kindly, but begged them earnestly to secure him a quiet, docile beast. They finally bought him a bay mare from a farmer named Sand Hill, west of several of the brethren had on occasions observed the shabby old mare standing untidily on the village street, patiently awaiting her master's pleasure; and they all agreed she would make a reliable mount for the inexperienced young clergyman.

After powerful assurances had been given him, Rev. Mr. Clarke was hoisted into the saddle and set off on his way. The mare was gentle with her shabby charge, and faithful enough to be sure; but she pulled up sedately at the first tavern door on the 6th line, and not a step farther was she sent for the cows; and the milking was late.

At daybreak the next morning, Bob was back scratching at the kitchen door.

He looked a bit travel-worn; and his muzzle was stained. Marshall scolded the dog harshly. "Oh! let poor Bobbie rest," said the wife, "he is greeting for his lad."

(To Be Continued)

were well thought of in the little community. And you know the sort of thing it was. The men cracked butternuts before the big fireplace; and the womanfolk amused themselves by sewing in their simple way. Hymns were sung and some victrolas were served before the party broke up. Oh! yes, Mrs. Edwards would write—she was one of those giggling women who tell the folk all about their trip.

It had been arranged that Charlie Marshall take the wagon and team, and give the Edwards a lift as far as Toronto. And I wish you to know this was a mighty important affair in the eyes of young Charlie. He was being trusted with that valuable team of bays—all on his own, as you may say. He was taking some produce down to his grandfather at the Tavern Tyroce—a drizzle of butter, hams and a few dressed chickens; and he might stay with her for a day or two. So he was all spruced up for the occasion. The harness had been oiled and the wagon wheels greased. Charlie's boots were shined to perfection; and Edwards had given him a dandy hair trim.

The party set off bright and early in the morning. They left with every one in the best of spirits, save Bob O'Neil Pilslog. The dog had planned, of course, to go along; but, at the last moment, Mrs. Marshall played a dirty trick on him, and tied him up. But a wise dog knows it is a long time that had no turning. Bob amused himself cracking fleas during the day, and consoled his soul in patience.

The time came for bringing the cows home for the evening milking. So, of course, they let Bob loose. But the dog's mind was not on the cows. He quietly trotted down the lane, and took the first turning to the left. He was not sent for the cows; and the milking was late.

At daybreak the next morning, Bob was back scratching at the kitchen door.

He looked a bit travel-worn; and his muzzle was stained. Marshall scolded the dog harshly. "Oh! let poor Bobbie rest," said the wife, "he is greeting for his lad."

## In Danger Of Extinction

Unless Strict Regulations Observed  
Whales Will Vanish From Seas

"The whale that wanders round the Pole," as Hilaire Belloc has observed, "is not a table fish." Would that were true for the whaling herds and their like are thrust back into the ocean to maintain prices the whale, so popular is its oil, is in serious danger of extinction.

If the agreement reached between governments interested in whaling is ratified, however, it should do a good deal to maintain the stock of whales. Of the three principal classifications of whales, the Right whale, which used to be hunted by the Basques in the Bay of Biscay, is already almost extinct; the monstrous-headed sperm whale, denizens of the tropical seas, is rare; and only the gigantic blue whale and the fin-whale are the subjects of competitive harpooning between British and Norwegian companies in the Antarctic seas.

A Geneva convention ratified in 1935 forbade the killing of Right whales, of calf whales, and of immature cow whales. (The cow whale is supposed to bear only one calf in two years.) The new agreement extends the prohibition to sperm whales and, most important, also fixes a nine-month close season for killing whales from the floating factories.

Last year, after a long and unfortunate dispute with Norway, the British whalers agreed to a three-month harpooning season, and it is obviously desirable that this should become permanent. Although Britain and Norway between them are responsible for four-fifths of the whales caught it is necessary that the other powers should come in, and it is probable since the official harpooning speed of harpooning and of extracting oil from whales grow that an agreed quota limiting the whale "output" should also be regularly arranged.

For unless whaling is strictly regulated this remarkable beast may soon join the white rhinoceros in oblivion.—Manchester Guardian.

Governor-Generalities  
Always humorous Lord Tweedsmuir can be depended on for a spark of laughter when he speaks. Addressing a group recently at Kingston, the Governor-General mentioned that he could not talk on subjects of political contention. He added he was hedged about in his speaking, saying: "In fact, I am confined to Governor-Generalities."

Found in the rivers and lakes of tropical America, the four-eyed minnow has an upper and lower set of eyes.

Very few parrots breed in captivity in the United States.

## Canada's Western Northland

Use Of Aircraft Makes Transportation And Exploration Less Difficult

"Canada's Western Northland," a companion publication to "Canada's Eastern Arctic," published in 1934, has just been issued by the Lands, Parks and Forests Branch of the Department of Mines and Resources. A most informative and interesting—even fascinating—booklet, it deals with the history, resources, population and the various aspects of the mainland portion of the Northwest Territories and the more westerly islands of the Arctic Archipelago. These two reports bring up to date and correlate available information relating to Canada's Northland.

Canada's Arctic possessions are, geographically, divided by Nature into two parts—the Western Arctic, reached from the Pacific ocean and down the Mackenzie river; and the Eastern Arctic to which access is gained from the Atlantic ocean and Hudson bay. Brought about by the ever-widening search for minerals and the use of aircraft as a means of transportation and exploration, impressions of the Northwest Territories have undergone considerable change within the past twenty years. Once regarded as being almost inaccessible, many areas are today within a few hours flying time of a number of cities and towns in Western Canada. In spite of the northern latitude, the Territories are not entirely regions of perpetual ice and snow. The winter is long and cold, but in the short summer the temperatures are high and the long periods of sunlight promote rapid growth of vegetation. In many parts of the Northwest Territories, the vegetation is good for local sustenance, and the so-called "barren lands" yield a profusion of wild flowers and mosses.

Since the seventeenth century the Territories have been an important product of furs, and have contributed upwards of \$27,000,000 in furs since 1922. Having in mind the need of conserving the game and fur-bearing animals as a means of livelihood for local population, and the Canadian Government has set aside large areas as native game preserves. While the fur trade is still a chief industry, the future of the Northwest Territories lies also in the development of its mineral resources.

Previous to 1929 the most important mineral development was the discovery of oil on the Mackenzie river near Norman. Then in 1930 came the notable discovery of petroleum deposits, from which radium is obtained at Great Bear Lake, and in 1936 a promising gold strike was made at Gordon Lake.

"Canada's Western Northland" brings out many interesting facts regarding the population, white and native, the industries, institutions, transportation and communications, climate, mammals and birds, fish, forests, geology and water-powers. It contains 52 illustrations, and gives the latest information available concerning Canada's Western Arctic possessions. Copies may be had upon application to the Director of the Lands, Parks and Forests Branch, Department of Mines and Resources, Ottawa.

## There's No Safety In Numbers

Not Where Flies Are Concerned Anyway

The number of flies that can trace their origin to one single female house-fly during the season runs into the millions.

When you consider that each single one of this host is an individual carrier of the worst sort of filth, it must be obvious how important it is to combat this menace. Flies delight in feeding on uncovered garbage, refuse, rotting animal and vegetable matter, horse manure, in fact, everything that is particularly obnoxious to humans.

Think what may happen if one of the loathsome pests gets into a home and is left unmolested. The baby's bottle, even the sleeping baby's lips, and any food or drink left are choice spots on which he will settle, leaving disease and even death in his wake.

What are we to do to fight this menace? Remove or protect all the breeding grounds we have mentioned, and any others that may prove breeding grounds for flies, and keep doors and windows protected with adequate screens. Cover all food and drink at all times. And, to make absolutely doubly sure, place some Wilson's Fly Pads around the house in every room. They attract the flies and kill them all very quickly.

## By Any Other Name

At a prize breakfast given in San Jose, California, the suggestion was made that the prune should be renamed "Petite Pomme Noir d'Amour," or "Little Black Apple of Love." However, the growers think that if it change in name is necessary "Tom" would be sufficient.

## Visits Home Of Ancestors

Prime Minister Mackenzie King Explores Old Manor House In Scotland

Mr. W. L. Mackenzie King, Prime Minister of Canada, was able recently to satisfy a life-long ambition. He traced the birthplace of his paternal grandfather to Ladyford, Tyrone, and had tea in the room which probably that pioneer was christened. Before leaving, Mr. Mackenzie King was presented with a carved wooden chair which had come from the old church at Tyrone.

It was indeed a day that the Canadian Premier will look back upon with the happiest of memories. Again and again he expressed his delight as he examined the old manor house which was his grandfather's home before he went to Canada with the Royal Horse Artillery.

"It is a great pleasure to me to visit the home of my grandparents," he said. "I only wish my father could have been here along with me."

It was by the happiest of coincidences that Mr. Mackenzie King was able to satisfy his lifelong wish. When he heard that he was to be offered the freedom of Aberdeen, he immediately wrote to Lady Aberdeen inquiring if she could make such inquiries as to the birthplace of his grandfather.

Lady Aberdeen got in touch with Mr. A. G. Brown, a former provost of Fraserburgh, who, after making an extensive search, discovered that it was at Ladyford that Mr. Mackenzie King's grandfather, Mr. John King, had spent his early days. It was a short time later that Mr. Brown received conclusive evidence from Register House in Edinburgh that Ladyford had actually been the home of Mr. John King.

The Dominion Premier could hardly wait to visit the old place. They motored to the house, which is surrounded by a lovely garden, descended on the surprised occupant, Mrs. Davidson, tenant of the farm of Ladyford, and for an hour Mr. Mackenzie King explored the building and its surroundings, being charmed with the old-world atmosphere of the place.

He was particularly interested in some old alone steps near the house which served as a mounting and dismounting place for ponies.

The building, which is at least 200 years old, is built very solidly of granite and roofed with old Scots slate. A two-story house with two side wings projecting forward, it has that substantial appearance typical of the old manor houses of Scotland.

It was in this house that Mr. King's grandfather was baptized on May 3, 1814, and when Mrs. Davidson insisted on her distinguished guest having tea in the room in which probably the ceremony was performed, Mr. Mackenzie King delightedly knew no bounds.—Aberdeen Press and Journal.

## Room Papered With Stamps

Stamp dealers and collectors in England spent a holiday at North Berkel studying the walls of a room papered with thousands of stamps. This was done by the owner to commemorate Queen Victoria's reign and took him 55 years to finish.

There was a British novel, "Generals Die in Bed," but it wasn't translated into the Russian.

## Little Helps For This Week

He maketh me to lie down in green pastures. Psalm 23:2.

O the peace at the heart of nature.  
O the light that is not of day.  
Why seek it afar forever  
When it cannot be taken away?

What joy it should be for me to look up and see God's love in everything, to feel that the blue depths of the sky are a real canopy of blessing, the roof of the house of my Father. To know if clouds pass over, it is just the unchangeable light they veil, and even when the day itself passes I shall see that the night itself only reveals new worlds of light. And to know if I could unwrap fold after fold of God's universe I should only find more and more blessings and see deeper and deeper into the love which is at the heart of it all.

## Experiment With Trees

New Fast Growing Poplar Has Been Evolved In Canada

A new race of trees is being bred in Canada, D. A. Macdonald, assistant Dominion forester, reports. Experiments give promise of a new fast-growing, tough poplar tree specially suited to the needs of the paper and match industries.

For the past year or so Dr. C. Heinburger, of the Dominion forestry service, who is described by fellow workers as one of the world's most eminent experts on forestry genetics, has been cross-breeding poplars to produce a tree combining the desirable characteristics of several species.

Encouraging results have been obtained, Mr. Macdonald said, with hybrid poplars possessing the fast-growing qualities of the Carolina poplar and the toughness of certain European varieties.

The Carolina poplar reached maturity in 12 or 15 years, is susceptible to rot at the centre. The slower growing European trees have the advantage of remaining firm throughout.

## King Of The Arctic

Northern Trader, After Exciting Career, Has Announced His Retirement

Charles D. Brower, far north trader, who made and lost several fortunes, rescued scores of shipwrecked persons and aided polar explorations in an exciting career as "King of the Arctic," announced his retirement at 70 to "spend the rest of my life in play."

After 52 years in this northern-most American settlement, Brower expressed only one regret: "Civilization is crowding me out, and there is no farther north refuge."

## Keeps Accurate Record

The United States is far advanced in the matter of keeping records and statistics. They have it down this fine: Every fourteen seconds there is a birth, a death every 22 seconds, an emigration every seven minutes and an immigration every 12 minutes. This results in an increase in population of one every 36 seconds.

Thousands of houses are being constructed in Greece.

## Town & District

Mr. and Mrs. S. Bullen of Cremona, are visiting the latter's parents here Mr. and Mrs. Thorburne. Mr. and Mrs. Bullen expect to be in town for the next week or so.

For the benefit of those Gleichenites who hold oil leases in the Stovevill area we have been informed that a prominent geologist stated he had section 27-22-12 very near the apex of the most logical formations for a big oil producer.

Mr. and Mrs. James Black entertained Mr. and Mrs. W. P. Pineau and Maureen at a farewell dinner party on Monday evening when covers were laid for ten. Mr. and Mrs. Pineau are leaving for Lethbridge where Mr. Pineau will take charge of the bank. End branch of the Bank of Commerce.

Town Engineer Lester has moved the small building a garage has been pump near the water tower, to the old well at the rear of The Call office and is making ready to install a pump in this well to supply the town water system. At the former site of the small building a garage has been moved making plenty of room for the pump and a fire work shop.

Engaged on road construction in this province since last fall, relief works camps in various areas have been closed down, according to an announcement by the provincial government. Some 12 camps which had a strength of 720 single unemployed men ceased operations on July 31, on which date financial aid from the Dominion government under the agreement with the province lapsed. They were work and wages camps. The camps were operated on the new Whitecourt to Sturgeon highway forming a new route to the Peace River district, Jasper, and Nordegg highways, besides highways in the Crowfoot Pass and Drumheller areas. Lack of federal aid forced the province to suspend operations of the camps, said an official.

### GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, Minister.  
At the request of many of those who attended service at the river on July 25th, it is planned to have another service for all those appointments at the same place on Sunday August 8th, at 7 p.m., weather permitting. Those having room in their cars are requested to make a place for any who may wish to attend but have no way of getting there.

### PICNICS DECLINING?

An exchange is quite cheered up as it notes revival of the old fashioned picnic. For a long time it has felt that these happy out door events have been on the wane, due largely to the evils of the automobile which carried farm folk off away beyond the confines of their neighborhood. Our local district appears to have been saved any decline in picnic enthusiasm, despite the evils of the automobiles. On the contrary picnics hereabouts have continued and their charm is perennial.

There is quite tendency on the part of some city papers to look upon the rural motor car as a great calamity undermining the morale of the country folk. When the old car finally collapses and folks are obliged to revert to horses and car chassis for bugles, a good many people are inclined to say "That is as things should be. It is cars and tractors and power machinery that has ruined everybody. When people have cars to gad about, going places and seeing things. The horse and the old chassis keeps them happier, less sophisticated and more contented."

This attitude is only stupid, but it is also cruel not understandable. The automobile has been an inestimable blessing to people. It has brought them together more frequently and from a wider radius. It has permitted broadening of horizons, little escape from the daily anxieties and worries that seem to be an inevitable feature of every day work. It has provided a vehicle to overcome the great distances characteristic even of community life in the west.

Those who have been forced back to use the horse for all their comings and goings, may meet the situation philosophically. But not with any conviction that their lives are enriched or ennobled thereby. No one was ever improved either in taste or outlook by being confined to a sphere of a few miles. Home scenes take on new value, if there is opportunity for contrast and comparison, and occasional escape. We have passed forever beyond the horse and buggy attitude of mind, and although many of us are obliged to revert to that condition temporarily let us hope the condition is only temporary and that
